

## BREEZE COILING MACHINE

- 
**All-electric, servo-controlled** giving true automatic set-up.
- 
**Unique design** enables bending to take place underneath the drum - this means tool changes take place from the top of the machine to allow for loading of heavy tool sets.
- 
**Scissor lift feature** for lowering and positioning heavy drums.
- 
**Easy to use HMI touch screen.** Storage of the bend data programs and notes allowing easy recall and set-up for repeat orders.

Machine	Breeze Coiler
Bend Direction	Clockwise & Anti-clockwise
Tube Capacity	5mm - 26mm OD
Pitch Capacity	50mm-350mm ID
Max. Coil Height	1200mm
Bend Torque	5,000Nm
Traverse Force	10,000N
Max. Pancake Diameter	1200mm
