

Introducing Radyne's New **Voyager Mini™** for uses in Brazing, Soldering, Heating, Drying, Coating, and Heat Shrinking applications.

Engineered and designed for ease of use and packaged in an industrial-grade ergonomic with easy to handle case and integrated power switch. The lighter and more efficient Voyager Mini Hand Held Transformer is built to streamline your processes. With the added efficiency, we can use our smaller power supply without sacrificing the power needed to get the job done. Saving costs on equipment, energy, and cooling requirements.

Improve Your Efficiency

- Bring Induction Heating to your assembly
- Faster, repeatable, and high-quality results
- Pre-Programed recipes or manually run on the fly
- Eliminates the need for highly trained operators
- Safety Designed in – Complies with NFPA 79 and NEC Article 665

Put out the Flame...

- Removes flame from your production floor
- Great for confined spaces
- Stop buying, storing, and moving gas cylinders
- No need for Carbon Monoxide venting
