TRIDAN DIE CART (MODIFIED)

The DIE CART (MODIFIED) was built to handle a 24-row die. A 1" thick plate by 32" wide and 49" long is welded onto the bottom of the die cart. Installing two new rigid and two new swivel steel wheels will handle the loading when mandatory lifting is required when working on die maintenance.

The DIE CART saves valuable time, prevents injuries to personnel and eliminates costly damage to tools and equipment.

Although designed and built outside, the design and construction meets and exceeds all the rigid standards which have become synonymous with the name TRIDAN. The DIE CART incorporates the design knowledge and workmanship of an organization intimately aware of the particular needs of such equipment.

SPECIFICATIONS

- 1.) Manually powered 4 point screw lift table
- 2.) Crank lift operation (synchronized 4 point lift elevation)
- 3.) Capacity is 5000 lbs.
- 4.) Table size 26" x 38"
- 5.) Minimum height off floor: 30"
- 6.) Maximum height off floor: 44"
- 7.) Wheel size: 8" steel (2 swivel 2 rigid)
- 8.) Long Blanchard Ground Plate For Base
- 9.) Floor lock
