

Why FLYMARKER® Mark like a Professional

- Manufactured in Germany by Markator, a dot peen and scribe manufacturer since 1984. **German Quality is built into every FlyMarker.**
- The FlyMarker was the first 100% portable, battery-operated, handheld marking system when it was introduced in 2004. We are currently on our 5th generation of FlyMarker. **You will not be a Beta Tester!**
- Full keyboard (including number pad) with screen that can be programmed right at the unit. **No need to rely on spotty wi-fi, bluetooth or your employee's smartphone.**
- Sold and serviced by Rocklin Manufacturing, a Sioux City, IA, manufacturer since 1934. The FlyMarker is a ruggedized and robust machine, but in the event that service is needed, our **Factory Trained Service Department** stocks all parts and promises a rapid turnaround to get you up and running as soon as possible. As a full manufacturing company, we are not just a sales office with a bunch of boxes in the corner.
- Expandable: Column Frame Mounts (turns the FlyMarker into a Tabletop Unit), Barcode Scanners (USB or Integrated), Logo Marking, Dot Matrix Code Marking, Read Keyboard Programming.....and much more. **Options that others can only dream of!**
- We offer full **Toll-Free Phone Support** as well as nationwide local sales support.
